Nature Perfected It. Our Process Delivers It.™

# SPECIALTY MANUFACTURERS AND DISTRIBUTORS OF PREMIUM PHYTOCANNABINOID INGREDIENTS

**Purity**

**Potency**

**Efficacy**

**Consistency**

**Quality**

**Service**

- As High As 37 Active Cannabinoids vs. 11-18 In Conventional Distillates
- As High As 5x More Minor Cannabinoids
- Organic Principles and No Synthetics Cannabinoids
- The "Ultimate Entourage Effect"
- Strain Specific Profiles
- THC Free <0.00% or THC Compliant <0.3%

- Improves Consumer Experience
- Adds Higher Value To Formulations
- Can Be Used At Full Strength
- Requires No Dilution For Shipping
- Safety, Consistency, Quality, Low Costs
- Facility Is Certified HAACP
- Registered With The FDA

A NEW GENERATION OF CANNABIS PROCESSORS  
BETTER INGREDIENTS CREATE BETTER PRODUCTS

Peerless Canna  
Nature Perfected It. Our Process Delivers It.™

# Peerless Canna

Nature Perfected It. Our Process Delivers It.™

## OUR STORY

“Nature perfected it. Our process delivers it.” is our trademark and it defines our vision. We intend to deliver the health and wellness benefits of natural cannabinoids to consumers across the globe and we want our name and reputation to be recognized for Purity, Potency, Efficacy, Quality, Safety, Consistency, and Lower Costs.

Peerless Canna is uniquely positioned to help CPG brands derive higher value from their products by providing premium phytocannabinoid ingredients for their food, beverage, and dietary supplement formulations. Our products are cost-effective and we are able to produce a range of formulations and outputs that cannot be matched by current producers.

Peerless Canna was founded by a team with over 200 years of experience in agricultural, bio-separation, food, nutraceutical, and pharmaceutical processing industries. Our mission is to apply our knowledge, experience, and leadership to support increased consumer understanding and confidence in the natural health and wellness benefits of this plant's natural “pharmaceutical factories”.

# PREMIUM CUSTOM BLEND DISTILLATES

Unmatched Purity, Potency, Efficacy  
and Quality for your Formulations

## CUSTOM FORMULATIONS FOR YOUR PRODUCTS

*%CBD + %MINORS + %THC + %TERPENES*

# Peerless Canna

Nature Perfected It. Our Process Delivers It.™

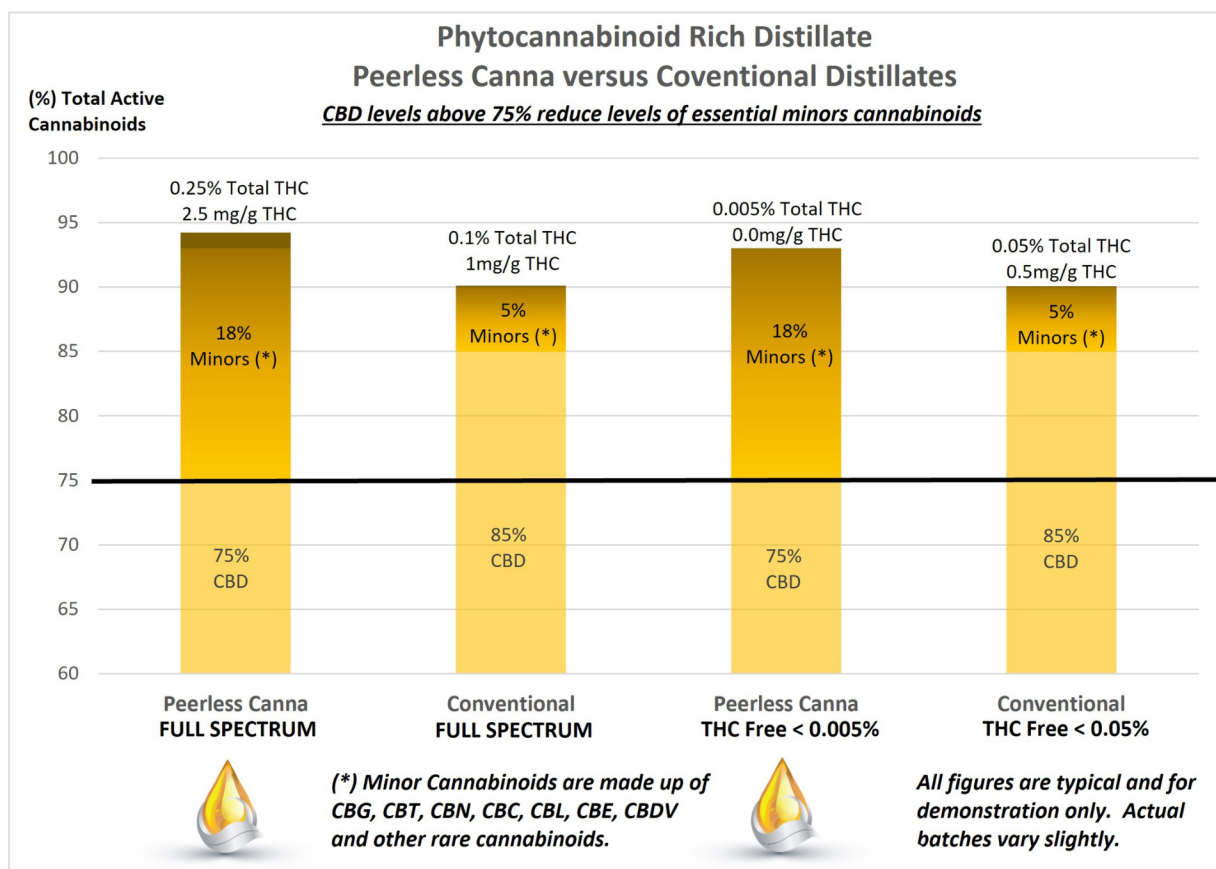

# THC Free (<0.001%) Phytocannabinoid Rich Distillate

Typically contains 75-85% CBD, approximately 2% to 4% of these minors (CBG, CBN, CBC), approximately 4% to 6% other minors (CBT, CBE, CBL, CBDV, and other rare cannabinoids). Can be custom remediated to total hemp derived THC content between less than 10 ppm (0.001%) THC and less than 0.3% THC.

Typically, the product contains 2-4% terpenes and approximately 1-2% other essential cannabis compounds. This product is solid or semi-solid at room temperature, amber in color with a natural terpene odor and flavor.

Can be used at full strength and is great for use in tinctures, edibles, cosmetics, and pet products.

## Our distillates contain higher levels of Total Active Cannabinoids

Contact [sales@peerlesscanna.com](mailto:sales@peerlesscanna.com) or visit [www.peerlesscanna.com](http://www.peerlesscanna.com) for a competitive quotation on price and delivery.

Peerless Canna  
Nature Perfected It. Our Process Delivers It.™

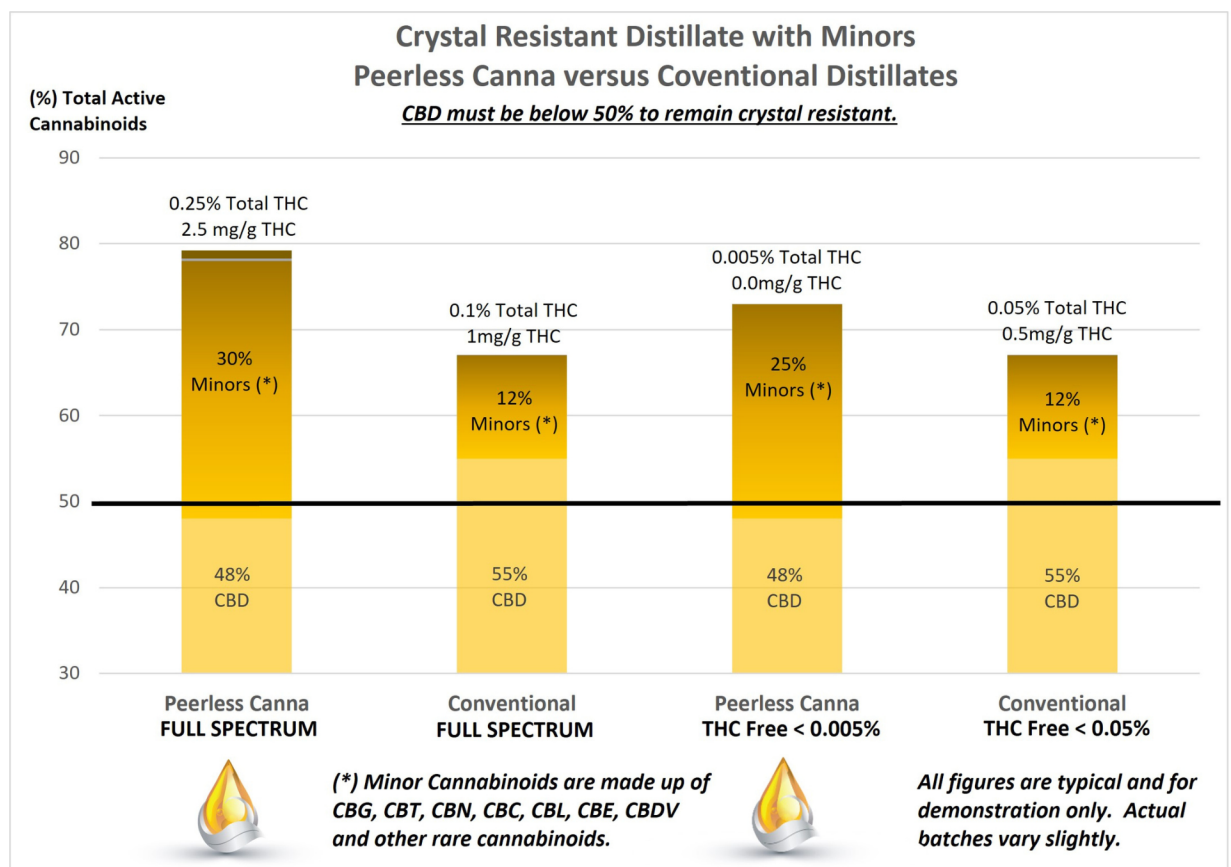

# Crystal Resistant Distillate with Minors

Typically contains 45-55% CBD, approximately 6% to 8% of these minors (CBG, CBN, CBC), approximately 12% to 15% other minors (CBT, CBE, CBL, CBDV, and other rare cannabinoids). Can be custom blended to total hemp derived THC content between less than 10 ppm (0.001%) THC and up to 3% THC. Products over 0.3% THC can only be sold to other licensed processors.

Typically, the product contains 5-10% terpenes and approximately 1-2% other essential cannabis compounds. This product is crystal resistant at room temperature, amber in color with a natural terpene odor and flavor.

Can be used at full strength and is great for use in vapes, tinctures, edibles, cosmetics, and pet products.

**100% distillate with no added cutting agents, solvents, diluents, VG, PG, PEG, MCT, fillers, modulators, Vitamin E, etc.!**

# What Differentiates Peerless Canna

**We can improve the quality of your product portfolio and elevate your sales.**

**Our premium ingredients add significant value to your formulations and provide a better experience for your customers.**

**Purity** - Our process uses safe efficient eco-friendly green food grade GRAS solvents & ingredients, and our refining operations reduce solvent, pesticide, heavy metal, and microbial contamination to non-detect levels second to none.

**Potency & Efficacy** - Our extraction technology removes and recovers higher levels of cannabinoids, our mild processing conditions preserve flavorful and aromatic properties, and our refining technology maintains the efficacy of the minor cannabinoids. Our process produces THC Free <0.00% or THC Compliant < 0.3% Full Spectrum Distillates by recovering, refining, purifying, and separating any cannabis strain, producing the “Ultimate Entourage Effect” while retaining the original plants cannabinoid profiles.

**Quality** - Adherence to the cGMP regulations allows Peerless Canna to ensure the identity, strength, quality, and purity of its products through a rigorously controlled and documented production process. Peerless Canna has established a strong quality management system, developed and enforces protocols for obtaining appropriate quality raw materials, established robust operating procedures, and put in place controls to detect and investigate any product quality deviations. This formal system of controls prevents instances of contamination, mix-ups, deviations, failures, and errors and assures that the products meet specified quality standards.

**Safety, & Consistency** - Our process uses organic principals to create the cleanest and safest products possible. Peerless Canna maintains a culture of standardization, transparency, and compliance, along with a unique integration and application of industry best practices, uncompromised safety, proven proprietary technologies, patented methods, and exclusive equipment in order help bring a clean, pure, and quality product to market.

**Lower Cost** - Peerless Canna can produce higher quality products at a lower cost providing more efficient and economical access to wholesale distributors, retail outlets and end consumers.
